

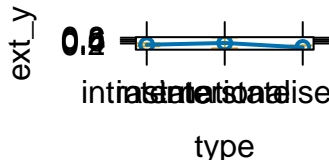

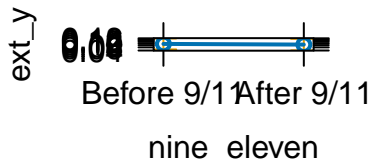

Figure 1 is a horizontal bar chart comparing the proportion of territorial and extraterritorial individuals for two species: *ext_y* and *territorial*. The x-axis represents the proportion from 0.0 to 1.0. For *ext_y*, the proportion of territorial individuals is approximately 0.25, and for extraterritorial individuals is approximately 0.75. For *territorial*, the proportion of territorial individuals is approximately 0.75, and for extraterritorial individuals is approximately 0.25.
